

Online Tier Three (PE) June 8-9, 2020

This intensive 2-day module provides training in Prolonged Exposure (PE) Therapy, an evidence- based treatment for PTSD described in the manual, Prolonged Exposure Therapy for PTSD – Therapist Guide, by Foa et al., 2007. It covers the empirical and theoretical support for PE and reviews the main clinical techniques used in this structured protocol. Step-by-step instructions for conducting PE therapy sessions, including in vivo and imaginal exposure, along with strategies for working with over- and under-engaged patients and other difficult cases, are shared. Videotaped examples of PE cases are used to demonstrate therapist skills. Participants are expected to do role-plays in class to practice PE techniques, and they must attend both days.

Target Audience: For behavioral health providers who treat military personnel, veterans, and their families. Specifically, this workshop is for Active Duty, GS-DoD, and contractor-DoD behavioral health providers who provide psychotherapy to Service members at a military facility. Nurses and nurse practitioners are also welcome as long as they meet those requirements.

Instructional Level: Intermediate

Learning Objectives:

Attendees will be able to:

- 1. Develop a theoretical conceptualization of a client's PTSD symptoms to guide treatment planning.
- 2. Communicate a rationale for Prolonged Exposure Therapy that builds rapport, improves client motivation, and increases treatment adherence.
- 3. Determine how common reactions to trauma relate to the symptoms of PTSD and articulate how these reactions impact client functioning.
- 4. Demonstrate an effective method of breathing that reduces client arousal and promotes distress tolerance.
- 5. Construct an individualized avoidance hierarchy designed to systematically confront core fears.
- 6. Implement in vivo exposure to block trauma related avoidance.
- 7. Facilitate imaginal exposure to reduce the intensity and frequency of PTSD symptoms.
- 8. Utilize specific skills to manage emotional engagement to increase the effectiveness of imaginal exposure.
- 9. Structure homework assignments that deepen exposure-based learning and further treatment goals.
- 10. Distinguish "hot spots" in the trauma memory in order to more efficiently reduce the intensity of associated symptoms.

- 11. Analyze exposure exercises to facilitate new learning and modify client's unhelpful, trauma-based cognitions.
- 12. Incorporate new learning to revise unhelpful cognitions that promote avoidance and maintain symptoms.
- 13. Assess Prolonged Exposure Therapy outcomes using standardized procedures and use assessment data to refine treatment planning.
- 14. Adapt exposure techniques in a theoretically consistent manner to improve accessibility and clinical outcomes for specific patients.

Star Behavioral Health Providers Tier Three (PE) Training June 8-9, 2020

Agenda

\mathbf{r}	Y	\sim	NI	

0900-1130 Theory & research behind PE
1130-1300 Overview of sessions 1-10
Establishing the therapeutic alliance Session #1 – Overall Rationale

1300-1400 LUNCH

1400-1530 Show DVD of Overall Rationale to demonstrate key points Break into dyads/triads to practice giving Overall Rationale Breathing training exercise Introduce Session #2 - Discuss common reactions to trauma

1530-1730 Continue with Session #2 - Review In-Vivo Exposure:

- Rationale
- Use of SUDS
- Construction of hierarchy
- Safety guidelines

Assignment of homework

DAY TWO

0900-1130 Show DVD of In-Vivo exposure to demonstrate key points Break into dyads/triads to practice constructing In-Vivo hierarchy

1130-1300 Introduce Session #3 - Imaginal Exposure:

• Rationale Procedures Assignment of homework

1300-1400 LUNCH

1400-1530 Show DVD of Imaginal Exposure to demonstrate key points Break into dyads/triads to practice doing Imaginal Exposure

1530-1730 Hotspot procedures and final session

Show DVD of final session: Difficult Patient Issues and Practical

Barriers: Modifications to PE Wrap-up

Location Information

Location Platform: Zoom

Date: June 8-9, 2020

Time: 9:00am - 5:30pm Eastern

Participate

Registration Information:

https://militaryfamily.secure.force.com/Tier3RegistrationForm?sState=Online

Cost/Refunds: Free

Special Accommodations:

If you require special accommodations due to a disability, please contact Chris Myers at christina.myers.ctr@usuhs.edu 4 weeks prior to the training so that we may provide you with appropriate service.

Presenters

Kelly Chrestman, Ph.D., is a Senior Military Behavioral Health Psychologist at the Center for Deployment Psychology. She provides training, support and consultation in Cognitive Behavioral Therapy and in the Assessment and Treatment of PTSD.

She works with the team at CDP to find new and better ways to link clinicians with both traditional and innovative resources that will help them implement EBPs more effectively. This includes leveraging computer technology and virtual assets to reach professionals that might otherwise have difficulty accessing high quality training and consultation.

Before coming to CDP, she trained at the National Center for PTSD in Boston, and at the University of Pennsylvania with Dr. Edna Foa. She is a Subject Matter Expert in Prolonged Exposure Therapy for PTSD and has trained numerous students and mental health professionals across the world in techniques for treating PTSD and other anxiety disorders. She also spent several years working closely with Native American Tribes where she focused on adapting evidence -based practice to better meet the needs of traditional Native communities.

She is co-author of the Adolescent PE Manual, Prolonged Exposure Therapy for Adolescents with PTSD, and has written about community and professional responses to trauma, particularly domestic violence and sexual assault. She is also a co-developer of the Virtual PTSD Learning Center and Operation Avatar, a game based educational experience about trauma and combat-related PTSD, both hosted in the Second Life Virtual World platform.

Paula Domenici, Ph.D., is Director of Training Education at the Center for Deployment Psychology (CDP) at the Uniformed Services University of the Health Sciences in Bethesda, Maryland. She oversees the development of courses and training programs for providers on evidence-based treatments for Service members and Veterans. She also presents workshops on deployment behavioral health topics for clinicians across the country. Dr. Domenici specializes in trauma and the treatment of PTSD using Prolonged Exposure Therapy (PE). When she first joined CDP in 2006, she worked at the National Naval Medical Center in the outpatient clinic and inpatient casualty care unit. Earlier in her career, she was APA Congressional Fellow as well as a Staff Psychologist at the San Francisco VA Medical Center. She has co-authored two self-help books for troops returning from Iraq and Afghanistan and their families including parents whose sons or daughters have served.

Jenna Ermold, Ph.D., is a clinical psychologist working as the Assistant Director of Training and Education for the Center for Deployment Psychology at the Uniformed Services University in Bethesda, Maryland. Dr. Ermold oversees the development of online and face-to-face trainings for behavioral health clinicians to improve clinical and

cultural competency in working with military members and their families. Dr. Ermold also presents workshops on deployment behavioral health topics for clinicians across the country. She is a graduate of the Malcolm Grow (USAF) Medical Center Psychology Residency Program and served on active duty as a psychologist in the United States Air Force from 2002 to 2006.

Dr. Ermold graduated from Middlebury College with a degree in psychology and English and received her doctorate in clinical psychology from the University of Vermont. She specializes in military culture, health psychology, behavioral health integration into primary care, post-traumatic stress disorder, prolonged exposure therapy and military psychology.

Continuing Education

The Center for Deployment Psychology is approved by the American Psychological Association to sponsor continuing education for psychologists. The Center for Deployment Psychology maintains responsibility for this program and its content.

The Center for Deployment Psychology offers attendees 14 credit hours for participation in this training. Participants attending events in person are required to sign-in at the start of the training and sign-out at the conclusion of the training in order to attain CE credit. Participant attendance data will be collected electronically during webinars. There is a 30-day time limit post-training to complete all CE requirements. Partial credits cannot be issued. Inquiries regarding CE credits may be directed via email to Chris Myers at christina.myers.ctr@usuhs.edu.

The CEs provided by the American Psychological Association are acceptable for most licensed professionals when renewing their license and it is our experience that APA CE credits have been recognized by most professional state license boards. However, please check with your board regarding the acceptability of APA CE credits for this activity.
