Brief Behavioral Treatment of Insomnia in Primary Care

Handouts
Brief Behavioral Treatment of Insomnia: Why do it?

1. Changing sleep habits (behaviors) can change sleep
2. Studies show that it works and that improvements last
3. Fewer possible side effects than medications

Brief Behavioral Treatment of Insomnia: How to do it?

• Provide information about your sleep using:
  o Sleep questionnaires
  o Weekly Sleep Log
• Then, make specific changes to your sleep habits to improve the quality of your sleep.
• The treatment requires a dedicated effort to the new recommended schedule and behavioral changes.
### TWO WEEK SLEEP DIARY

**INSTRUCTIONS:**

1. Write the date, day of the week and type of day: (W)ork, (S)chool, (O)ff or (V)acation.
2. Put the letter “C” in the box when you have any caffeinated beverage or supplement that includes caffeine. Put “M” when you take ANY Medication. Put “A” when you drink alcohol. Put “E” when you exercise.
3. Put a line (l) to show when you get in bed. Shade in the box that shows when you think you fell asleep.
4. Shade in all the boxes that show when you are asleep include all naps.
5. Rate your sleep quality (1 = Very Restless, 2 = Restless, 3 = Average, 4 = Sound, 5 = Very Sound) & morning restedness (1 = Exhausted, 2 = Tired, 3 = Average, 4 = Rather Refreshed, 5 = Very Refreshed).

**SAMPLE ENTRY:** On Monday when I worked, I jogged on my lunch break at 1 PM, had a glass of wine with dinner at 6 PM, fell asleep Watching TV from 7-8 PM, went to bed at 10:30 pm, fell asleep around midnight woke up and couldn’t get back to sleep until about 5 am, slept from 5-7 am, got out of bed at 7:30 am and had coffee and medicine before going to work.

**WEEK ONE**

**WEEK TWO**
What controls sleep?

- Sleep Drive -- how long you have been awake
- Biological Clock-- complex mechanism in the brain that works to keep us awake, then works to keep us asleep
- Mental activity and physical or medical issues-- thinking, worrying, bad dreams, injuries, medications, other sleep problems
Four Steps to Reduce Insomnia

1. **Reduce your time in bed**
   Cutting down your time in bed = increasing how long you’ve been awake out of bed which leads to quicker, deeper, more solid sleep. Not decreasing the amount of SLEEP you get, just the amount of time AWAKE in bed.

2. **Don’t go to bed unless you are sleepy**
   Going to bed when you’re not sleepy can lead to frustration and gives your brain the wrong message.

3. **Don’t stay in bed unless you are asleep**
   Helps to train your brain: Bed = Sleep

4. **Get up at the same time every day of the week, no matter how much you slept the night before**
   Getting up at the same time helps to set the biological clock. If you’ve slept poorly, getting up at the same time helps you to sleep better the next night by building up more sleep drive during the day.
Activities That You Can Do When You Get Out of Bed

Behaviors That Help Sleep:

- Consistent wind-down routine
- A comfortable sleep environment (quiet, dark, safe, cool temperature, without pets)
- Exercising in the late afternoon or early evening
- Hot bath in the late afternoon or early evening

Behaviors That Hurt Sleep:

- Alcohol and caffeine
- Tobacco
- Other substances
- A poor sleep environment
- Watching the clock
- Daytime napping
- Excessive evening liquid intake
- Exercising too close to bedtime
INSTRUCTIONS:
1. Write the date, day of the week and type of day: (W)ork, (S)chool, (O)ff or (V)acation.
2. Put the letter “C” in the box when you have any caffeinated beverage or supplement that includes caffeine. Put “M” when you take ANY Medication. Put “A” when you drink alcohol. Put “E” when you exercise.
3. Put a line (I) to show when you get in bed. Shade in the box that shows when you think you fell asleep.
4. Shade in all the boxes that show when you are asleep include all naps.
5. Rate your sleep quality (1 = Very Restless, 2 = Restless, 3 = Average, 4 = Sound, 5 = Very Sound) & morning restedness (1 = Exhausted, 2 = Tired, 3 = Average, 4 = Rather Refreshed, 5 = Very Refreshed)

SAMPLE ENTRY: On Monday when I worked, I jogged on my lunch break at 1 PM, had a glass of wine with dinner at 6 PM, fell asleep watching TV from 7-8 PM, went to bed at 10:30 pm, fell asleep around midnight woke up and couldn’t get back to sleep until about 5 am, slept from 5-7 am, got out of bed at 7:30 am and had coffee and medicine before going to work.

Modifying Your Sleep Schedule – 30/30 Rule

• *When can I increase my sleep time?*

**IF**, during the previous week, you are...

   Falling asleep in less than 30 minutes AND

   Spending less than 30 minutes awake during the middle of the night...

**THEN**...

   You can increase your time in bed by 15 MINUTES during the next week.

• *When do I know I have enough sleep?*

**IF** you notice more trouble with sleep (taking longer than 30 minutes to fall asleep OR spending more than 30 minutes awake during the middle of the night)...

**THEN**...

   REDUCE your time in bed by 15 minutes during the next week
**TWO WEEK SLEEP DIARY**

**INSTRUCTIONS:**

1. Write the date, day of the week and type of day: (W)ork, (S)chool, (O)ff or (V)acation.
2. Put the letter “C” in the box when you have any caffeinated beverage or supplement that includes caffeine. Put “M” when you take ANY Medication. Put “A” when you drink alcohol. Put “E” when you exercise.
3. Put a line (l) to show when you get in bed. Shade in the box that shows when you think you fell asleep.
4. Shade in all the boxes that show when you are asleep include all naps.
5. Rate your sleep quality (1 = Very Restless, 2 = Restless, 3 = Average, 4 = Sound, 5 = Very Sound) & morning restedness (1 = Exhausted, 2 = Tired, 3 = Average, 4 = Rather Refreshed, 5 = Very Refreshed)
